AIR GRILLES & REGISTERS

AIR GRILLES & REGISTERS

ANA Air Grilles and Registers

Is designed for supplying or returning air, commonly used in wall air distribution applications. Basically constructed with single or double deflection blades, horizontally or vertically.

ANA AG and AR Construction

Frame :

Constructed from extruded Aluminum alloy **6063** Profiles, with a thickness of **(1.2 mm)**, neck depth of **(25 mm or 45 mm)** ,depends on deflection options, and a flange width of **(30 mm)**.

Blades :

Constructed from extruded Aluminum alloy **6063** Profiles, attached horizontally as standard (Vertical front blades is available upon request) to the frame, and arranged with **(20 mm)** distances between each two blades centers.

Dampers:

Added in air registers, Opposed blade damper (OBD) type easily attached to the top side of the grille by locking clips, constructed from extrude Aluminum alloy **6063**.

Finish :

Electrostatic powder coating is used for AG and AR with standard white color for the Frame and the blades **(RAL 9016)** and black color for the damper **(RAL 9005)** and other colors are available upon request from the customer.

ANA Supply Air Grille

Model : NSAG - X

- Double deflection Horizontal or Vertical attached front blades with **(20 mm)** distance between the blades (Front Horizontal blades are standard)
- Front and rear blades are movable and can be adjusted to the required angle.

ANA Return Air Grille

Model : NRAG - X

- Single deflection Horizontal or Vertical attached blades with **(20 mm)** distance between the blades.
- Blades are movable and can be adjusted to the required angle.

*X - H (Front Blades are Horizontal) and V (Front Blades are Vertical)

Standard - Horizontal Front Blades

ANA Supply Air Register

Model : NSAR- X

- Double deflection Horizontal or Vertical attached front blades with **(20 mm)** distance between the blades.
- Front and rear blades are movable and can be adjusted to the required angle.
- Opposed blade damper (OBD) is attached to the neck with locking clips and it's lever operated.

ANA Return Air Register

Model : NRAR- X

- Single deflection Horizontal or Vertical attached blades with **(20 mm)** distance between the blades.
- Blades are movable and can be adjusted to the required angle.
- Opposed blade damper (OBD) is attached to the neck with locking clips and it's lever operated.

*X - H (Front Blades are Horizontal) and V (Front Blades are Vertical)

Standard - Front Blades will be Horizontal

ANA Fixed Blade Air Grille

Model : NFBAG - X

- Single side of fixed blades with **(20 mm)** distance between each two blades center, used as transfer grille to pass the air to other rooms and partitions.
- Blades are fixed in an angle of **45°**.

ANA Fixed Blade Air Register

Model : NFBAR - X

- Single side of fixed blades with **(20 mm)** distance between each two blades center, used as transfer grille to pass the air to other rooms and partitions.
- Blades are fixed in an angle of **45°**.
- Opposed blade damper (OBD) is attached to the neck with locking clips and it's lever operated.

ANA Curved Air Grille

Radius up to Inside face of Grill

- The grilles are carefully constructed to be unobtrusive in appearance for architectural excellence. The grilles may be used in ceiling, side wall applications and Spiral duct etc.
- Single deflection with Horizontal movable blades are spaced with 20mm distance
- Radius up to the face of the grill or backside cutting on the height side of the grill.
- Opposed Blade damper (OBD) is not available for Curved Air Grille

ANA Air Grilles & Registers Dimensions

W = Ceiling or Wall opening width

For selections please use technical data table or use the quick selection table to determine the suitable AG or AR size :

1. Calculate the value of the air flow.
2. Use the Data sheet to determine the suitable size according to the required throw and NC.
3. For preselected sizes specifications, search for the size or the closest bigger size.

ANA AG and AR Installation :

Screw in wall

Clamp & Strap*

Clamp & Strap in Plenum

Screw in Wall

Screw on duct collar

Spring Clip

ANA Long AG and AR

- AG and AR at ANA factory are manufactured in a maximum length of 5 meters per single piece .
- Each 30 cm blades are reinforced with abutment in between.
- * Clamp and Strap will be provided with additional cost.
